Heini	Created	Assembly	Test assembly 27 Nov	NA	name: Test assembly 27 Nov,item_description: Test description - content assembly,item_version: V1,notes: Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.,item_date: 2024-11-27,created_by: 454,id: 2360	11/27/2024

Chante	Created	Assembly	FIAC101 - Financial Accounting 101	NA	name: FIAC101 - Financial Accounting 101 ,item_description: The purpose of this module is to provide a foundational understanding of financial accounting principles and practices, covering fundamental concepts such as the recording and processing of transactions, adjustments, and the closing-off procedure. It explores analysing financial position and performance, including cash management, credit granting, inventory, and asset valuation. Furthermore, it explores liabilities, both current and non-current, and their impact on financial statements. Students will be introduced to the preparation of financial statements for sole proprietorships, non-profit entities, and dealing with incomplete records. By the end of this module, students will have acquired the necessary skills to interpret financial data accurately, assess the financial health of a business, and prepare financial statements in accordance with acceptable accounting standards. ,item_version: V1,notes: Programme Name: Bachelor of Commerce Module Name: Financial Accounting 101 NQF Level: 5 Module Code: FIAC101 Credits: 12 School: Business Notional Hours: 120 Year Level: 1 Pre-requisites/Co-Requisite: none Duration: 1 semester Editor: Elizabeth Malan	9/5/2024

Reagan	Edited	Assembly	INMP00F - Introduction to Music Production	notes:This module offers a thorough introduction to the foundational principles and theories of music technology and audio production. Students will develop a theoretical understanding of essential concepts and practices prevalent in the modern music production industry. Topics covered include hardware, software, the ever-evolving field of digital audio technology and foundational audio production knowledge and practices. Through this module, students will acquire fundamental skills, knowledge and competencies while exploring the expansive field of music production. This techniques and concepts learned can be applied across various Digital Audio Workstations (DAWs) and musical styles beyond those addressed in the module. The module will be presented by means of learning opportunities, class discussions, practical applications and assessment opportunities. Attendance is compulsory for all classes. You are responsible (under the guidance of the lecturer) for your own progress. Emphasis will be placed on as much participation from the students as possible. Co-operative and meta learning strategies will extensively be employed to	notes:https://cadcorporation.sharepoint.com/:x:/s/AIEGroup/Ee5vA6NaxGNKu7v2_mKxTq0BJsos8Qr2V-WFWDRdHMPlnw?e=2TCgLY&ovuser=78a74a06-7d8f-4205-95ca-836e6937e795%2CReagans%40aie.ac&clickparams=eyJBcHBOYW1lIjoiVGVhbXMtRGVza3RvcCIsIkFwcFZlcnNpb24iOiI0OS8yNDA3MTEyODgyNSIsIkhhc0ZlZGVyYXRlZFVzZXIiOmZhbHNlfQ%3D%3D	8/15/2024

User	Action Type	Resource Type	Resource Name	Old Value	New Value	Date
					programs such as spreadsheets or business intelligence software. Among other functions, pivot-table tools can automatically sort, count, total or give the average of the data stored in one table or spreadsheet. It displays the results in a second table (called a "pivot table") showing the summarized data. Pivot tables are also useful for quickly creating unweighted cross tabulations. A deep dive into the functions in this application in Excel.,item_version: V1,notes: *SLP from LMS *2016 version,item_date: 2024-07-16,created_by: 305,id: 1444

Chante	Edited	Assembly	ELEF102-Electrical Engineering Fundamentals 102	item_description:,notes:*Diploma in Electrical Engineering	item_description:The purpose of this module is to develop fundamental knowledge of the principles and methods applied in electrical systems. It begins with the concept of electrical charge, electric and magnetic fields, and develops into applications such as the motor, transformer and power electronic devices. The module provides a practical approach with application of the theoretical concepts in laboratory analysis and design exercises.,notes:*Diploma in Electrical Engineering	7/11/2024

Chante	Created	Assembly	MOEM102 - Modern Engineering Material	NA	name: MOEM102 - Modern Engineering Material ,item_description: The main purpose of this module is to study, describe, investigate, and explore modern materials that are useful in engineering. The study is basic and toward the end covers several applications in disciplines such as civil, mechanical and electrical engineering. Students are able to explore sample materials through simulation studies laboratory exercises.,item_version: V1,notes: *Created 03/07/2024,item_date: 2024-07-03,created_by: 474,id: 1457	7/3/2024
Chante	Created	Assembly	DIIC102 - Differential and Integral Calculus	NA	name: DIIC102 - Differential and Integral Calculus,item_description: The module aims to provide the students with an ability to work with the methods and applications of multi variable differential and integral calculus such as vector calculus, differential equations and linear algebra so that they can be able to apply these concepts successfully in solving simple to complex engineering problems. In addition, this module equips the students with the ability to solve complex mathematical problems including the use of Cartesian equation in complex numbers, as well as double, triple, line and surface integrals, including the basic integral theorems of multi-variable functions like Gauss theorem and Stokes theorem,item_version: V1,notes: *Created 03/07/2024,item_date: 2024-07-03,created_by: 474,id: 1457	7/3/2024

Chante	Created	Assembly	BUIA102 - Business Intelligence and Analysis 102	NA	name: BUIA102 - Business Intelligence and Analysis 102 ,item_description: This module deepens students' understanding of decision support systems (DSS) and their integral role in business intelligence. It covers mathematical models, data mining methods, exploratory data analysis, and big data concepts. Students will explore business intelligence tools for decision-making, explore predictive analytics, and evaluate the advantages and disadvantages of DSS. This approach equips students with foundational skills and knowledge required to enhance strategic business decisions. ,item_version: V1,notes: *Created on 26/06/2024,item_date: 2024-06-26,created_by: 474,id: 1457	6/26/2024
Chante	Edited	Assembly	Digital Marketing 102	NA	NA	6/26/2024
Chante	Created	Assembly	Digital Marketing 102	NA	name: Digital Marketing 102 ,item_description: This module is designed to provide students with a comprehensive understanding of digital marketing, including its various channels and techniques, as well as how to create effective digital marketing strategies. Topics covered in this module include online advertising, lead generation, mobile web marketing, affiliate marketing, Google AdSense, blogging, web analytics, and marketing as a freelancer. Through this module, learners will develop a deep understanding of the tools and techniques used in each of these areas, and how to apply them to real-world digital marketing challenges. Additionally, students will develop practical skills in creating and executing digital marketing strategies, including how to target specific audiences and achieve specific business goals. By the end of this module, students will be equipped with the knowledge and skills necessary to succeed in the fast-paced and ever-evolving world of	6/26/2024

Chante	Created	Assembly	Event, Travel and Tourism Management 102	NA	name: Event, Travel and Tourism Management 102 ,item_description: This module expands on events management within the context of travel and tourism management. Students will define events management and discuss its role as an organised activity requiring active project management. The module covers event design and production for optimal attendee experiences, the operational environment with a focus on law and logistics, and key components of event marketing. Additionally, students will explore event health, safety, and risk management, particularly within the South African context, ensuring they are equipped with essential skills and knowledge for successful event execution.,item_version: V1,notes: *Created 26/06/2024,item_date: 2024-06-26,created_by: 474,id: 1457	6/26/2024
Chante	Created	Assembly	Office Administration 102	NA	name: Office Administration 102 ,item_description: This module aims to develop students' competencies in essential administrative skills by focusing on various key areas. Students will learn the importance of relationship management as the foundation for effective administration and understand the concept of compassionate communication. The module covers building confidence and its impact on workplace efficacy, strategies for dealing with difficult people and conflict resolution, and effective time management and organization. Additionally, it includes practical steps for organising meetings and events, ergonomic best practices in the administrative workplace, the benefits of networking, and leveraging digital tools and social media for professional growth. ,item_version: V1,notes: *Created 26/06/024,item_date: 2024-06-26,created_by: 474,id: 1457	6/26/2024

Reagan	Created	Assembly	Adobe Illustrator Advanced SLP	NA	name: Adobe Illustrator Advanced SLP,item_description: You have created simple artwork by using the basic drawing and painting tools available in Adobe® Illustrator® CC. You now want to use advanced tools, options, and effects to create complex artwork. In addition, you want to ensure that your artwork is ready for commercial printing and also save it for the web. In this course, you will draw complex illustrations and enhance them by using various painting options. You will also use painting tools, manage colors, format type, work with effects, prepare artwork for commercial printing, and prepare graphics for the web.,item_version: V1,notes: *Videos were added 24/01/2022 *LG updated 17/02/2022,item_date: 2024-06-24,created_by: 305,id: 817	6/24/2024

Reagan	Created	Assembly	Primary Labour Legislation (Accredited) SLP	NA	name: Primary Labour Legislation (Accredited) SLP,item_description: This learning programme is intended for all persons who need to demonstrate basic understanding of the Primary labour legislation that impacts on a business unit. This unit standard is intended for managers of small businesses and junior managers of business units in larger organisations. The term business unit in this unit standard implies a small business, cost center, section or department. Junior managers include, but are not limited to team leaders, supervisors, first line managers and section heads. The position or term is used to describe the first level of management in an organisation at which an employee has other employees reporting to him/her.,item_version: V1,notes: *Accredited course for students only taking this course (LMS),item_date: 2024-05-30,created_by: 305,id: 1596	5/30/2024

Chante	Edited	Assembly	ENS200F - Engineering Science N2	item_description:Engineering science is a broad discipline that encompasses many different scientific principles and associated mathematics that underlie engineering. It integrates engineering, biological, chemical, mathematical, and physical sciences with the arts, humanities, social sciences, and the professions to tackle the most demanding challenges and advance the well-being of global society. Engineering science majors use math and science principles from a wide range of disciplines to solve engineering problems.,notes:*created 24/04/2024 SoE Foundation	item_description:The Engineering Science N2 module provides an overview of dynamics, statics, energy principles, mechanical power transmission, friction concepts, thermodynamics, and electricity fundamentals. Students learn to analyze linear and angular motion, forces acting on particles/rigid bodies, and conditions for equilibrium. The module covers calculations for work, power, energy and momentum. Other topics include friction forces, mechanical drive systems like gears and hydraulics, heat transfer mechanisms, and basic electric circuits and components. Throughout, an emphasis is placed on applying physics concepts and formulas to solve practical engineering problems. ,notes:*created 24/04/2024 SoE Foundation *Edited 24/05/2024	5/24/2024

Chante	Edited	Assembly	ENS100F - Engineering Science N1	notes:*created 24/04/2024 SoE Foundation	notes:*created 24/04/2024 SoE Foundation *Edited 24/05/2024	5/24/2024
Chante	Edited	Assembly	ENS100F - Engineering Science N1	item_description:Engineering Science N1	item_description:This module covers the fundamentals of electricity, beginning with basics like conductors, insulators, and resistors. Students will learn about current flow through simple electric circuits and Ohm's law relating current, voltage, and resistance. The heating effects of electric currents are explored. The module progresses to more advanced concepts like combining resistors in series and parallel, calculating equivalent resistances, and analyzing the factors that influence resistance such as temperature. It also introduces the principles of electromagnetism.	5/24/2024
