PROFESSIONAL EXPERIENCE

2022 November – present	Skiivia Innovation, Mobile App Developer	Chandigarh, India
2022 January – 2022 October	Soft Prodigy Private Ltd., Mobile App Developer	Chandigarh, India

PROJECTS

2023 March – 2023 November	PBA1, Api's based Social Media Application I have developed a social media mobile application that operates seamlessly across different platforms. Users can easily create and share multiple posts, with the added functionality of the ability to like, comment on nested threads, and share posts. Moreover
2022 June – 2023 March	IAF eRading, App for Indian AirForce war information. This application serves as a comprehensive repository for all information pertaining to the Indian Air Force. Designed to be fully responsive, it seamlessly supports multiple mobile devices, including Android, iOS, and tablets. Users can access a range of information related to wars, as well as details about organised events within the Indian Air Force.
2023 November – present	Sai_Alert, App for Managing for Grocery Shops This application is designed to prevent theft in shops. Users can automatically generate bills using the app while shopping. In case of attempted theft, the app sends a notification to the user's mobile device. Additionally, the application helps manage crowd control in the shop by detecting and notifying users about queues through the shop's camera system
